

In-Dash Tracker

VT1508

Covert In-Dash GPS Tracker

The Main Functions!

Covertly installed, precise tracking, best protection for your asset.

Updates location every 60 seconds while moving.

Speeding and geofence alerts.

Internal cellular and GPS antennas.

Monitors engine idling conditions.

Robust, Reliable, Economical, Effective

This robust unit provides continuous 24/7 real-time covert tracking for trucks, cars, and field equipments. It is an ideal fit for fleet management & security, auto rental, asset tracking, and many other automotive and heavy duty trucking applications. It is equipped with the latest future-proofed 4G modem, the latest GPS chipset, a built-in 1500mAH backup battery, a 3-axis accelerometer for motion detection as well as an intelligent firmware with ultralow power sleep modes. The AnyFleet web portal provides a rich source of data to assist you in operating your fleet more efficiently.

Always know where your assets are,
and where they've been.

AnyFleet

Track and Manage Your Assets
Anytime, Anywhere

Our Web Portal has many Features to help you
improve the efficiency of your Business.

Many of our clients have used it to integrate the data provided by any of Anytrek's GPS tracking products into their management platforms. Our APIs are secure, robust and use industry-standard REST API calls that in most cases allow for integration to occur in minutes. Clients using software from any of our integration partners (shown below) will be able to start using any GPS tracker from Anytrek immediately without having to do anything.

API's for easy integration, already certified with:

Manage your Assets with Accurate Data
